- Mac Studio M1

FRAMEWORKS & LIBRARIES

- Remix.run / React JS / Next JS
- Typescript
- GraphQL + Apollo
- Node + Express
- Jest + Testing Library + Cypress
- Tailwind / Styled Components / Sass

+ EXPERIENCE

BLOCKCHAIN CREATIVE LABS SENIOR TECHNICAL LEAD | 2021 - PRESENT

- Lead team of engineers and performed hands-on full-stack planning, design and execution in building and architecting APIs, backend infrastructure and FE platform components for various Web3 clients and projects. Maintained and contributed significant UX/UI improvements to pre-existing code bases/web applications.

JUSTYN CLARK NETWORK CEO/FOUNDER | 2008 - PRESENT

- Connecting and educating communities, creators, innovators, builders and users into the future of modern technology bridging over a decade's worth of experience building small company brands up from scratch to global marketing scale and working in-house at some of the biggest corporate names in technology, music, gaming, entertainment, art and fitness industries delivering full-range digital multimedia content services and solutions, web design and development, UI/UX design, graphic design, motion graphics, photography, animation, compositing, video production and editing, music production, audio editing and sound mixing.

FOX CORPORATION SENIOR SOFTWARE ENGINEER, FRONT-END | 2019 - 2021

- I recently shipped a large solo re-platform/re-factor effort from end-to-end of Fox's CTV second screen activation site (go.fox.com) to Production. I owned and executed the entire project from early presentations and proposals to the CPE web team and stakeholders, prototyping, tech stack and architect decisions, planning and delivery.

- Results achieved a company OKR to update legacy infrastructure and code bases, introduced a new powerful framework to Fox's tech stacks, improved developer experience and reduced operational costs.

Last year I feature lead the Fox Now live page EPG redesign project helping steer the entire process. I translated product requirements into dev tasks and collaborated with developers with implementation. Reports showed improvements made a huge impact on users resulting in increased engagement, conversions and ad revenue.

After, I was recognized by EVP of Digital Platforms among the engineering department as having received multiple anonymous nominations and named me winner of Fox Technology Spotlight Award and was gifted in recognition.

WARNER BROS. SOFTWARE ENGINEER | 2018 - 2019

- Replatformed, built and launched www.wizardingworld.com for Wizarding World Digital and Warner Bros. using React, Apollo/GraphQL, Node and Terraform with AWS infrastructure utilizing services such as Lambda, S3, EC2, CloudFormation, Cognito, CloudFront and DynamoDB.
- Collaborated with multiple teams of engineers, stakeholders, product clients internationally in Agile Scrum.
- Implemented unit tests, UX/UI performance enhancements, analytics tracking and performed daily code reviews.

ACTIVISION BLIZZARD FRONT-END ENGINEER | 2017 - 2019

- Built Call of Duty companion mobile app for iOS and Android. Directed in planning, architecture and structuring of reusable UI components and API services. Trained junior team members and over saw code quality.
- Replatformed and built the new Activision Press Center from scratch into an optimised, responsive single web page resulting in yearly cost reductions of \$200,000 for the company. (www.press.activision.com)
- Executed major migration, conversion and restructuring of 15+ forum and blog stylesheet sets from Sass in Lithium into Less in Adobe Experience Manager creating improved flexibility and site maintainability.
- Created biweekly Front-end dev meetings where I advocated, trained and introduced team members to modern tools, best practices and workflows leading to increased productivity and better developer experience.

REGENT EQUITY COMPANIES, LLC FRONT-END WEB DEVELOPER | 2016

- Developed and implemented data-driven website UI/UX enhancements, features and product development for HistoryNet.com resulting in substantial increases in overall engagement and revenue.
- Assisted in a major homebrew CMS platform migration and upgrade to Magento 2.1 for multiple Current Media Group eCommerce catalog websites.

DREAM WARRIOR GROUP LEAD FRONT-END DEVELOPER | 2013 - 2015

- Developed dozens of custom responsive CMS websites, landing pages, blogs, and site redesigns for a wide range of small businesses and major performing arts organizations.
- Coded numerous e-newsletters reaching thousands of recipients weekly and provided SEO site audit reports.

WEB 2 MOBILE DESIGN FRONT-END DEVELOPER | 2011 - 2012

- Produced marketing materials for web, UI/UX design mockups for team programmers, video, and print for client mobile app associated websites. Conducted marketing and research to identify potential customers, setup and regularly conducted client meetings which converted in to signed contracts for the company.
